

## **Report Prof. Ricciardi Pasquale Marizio**

Dirigente Sanitario Responsabile UO Settore Interdistrettuale di Medicina dello Sport ASL RM C-ROMA-EUR.

Docente di Biofisica Clinica Università La Sapienza-Roma

Docente di Neurofisiologia Posturale Università Tor Vergata Roma.

### **algonix treatment reports year 2002**

(algonix's use in Sport Medicine Public Centre)

#### **Abstract**

In the treatment of skeletal-muscular pain we used a computerized electro stimulator ([algonix by medilab](#)).

This new device is a bio-impedance detector fully controlled by an Artificial Intelligence Biofeedback.

The low percentage of negative results leads us to believe that this new therapeutic method is highly effective instrument in any case of painful pathology.

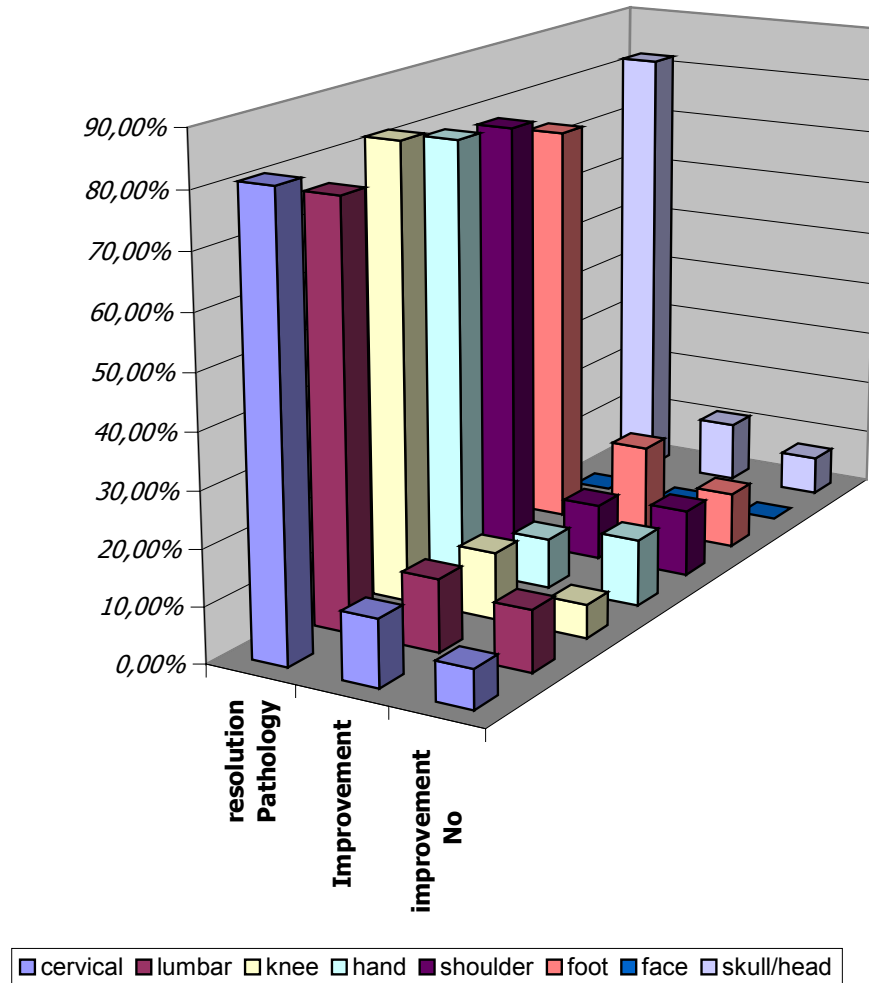

The demonstration of this is the high number of patients (90%) that have a decrease in symptoms and the many cases of total recovery (79%).
